Portfolio

Career Objective

I am an engineering student seeking an entry-level position to leverage skills in Python, data analysis, machine learning, and model development. Passionate about applying AI & ML techniques to solve complex problems, improve business outcomes, and contribute to innovative technology solutions.

Education

•Bachelor of Technology in Computer Science & Engineering (AI & ML)

Nov 2022 - Jun 2026

KG Reddy College of Engineering & Technology, Telangana, India

CGPA: 8.75

Experience

•Web Development Intern | Certificate – I & T Labs

Dec 2023 – Jan 2024

Hyderabad, India

- Developed and maintained full-stack web applications using Flask, HTML, CSS and JavaScript.
- Collaborated using Git/GitHub and implemented version control practices in a team environment.

•Machine Learning Intern | Certificate – InternPe India

Mar 2024 – Apr 2024

Remote

- Built and trained machine learning models to predict trends using Scikit-learn and Pandas.
- Worked on preprocessing and model development.

Personal Projects

•CropConnectAI

HTML, CSS, JavaScript, Flask, APIs

Comprehensive farmer-assistance platform with AI-powered features.

- Created farmer-assistance platform providing real-time crop prices and market information.
- Implemented voice translation features for enhanced accessibility across language barriers.

•SmartDischarge

HTML, CSS, JavaScript, Flask

Automated hospital discharge summary generation system.

- Developed AI-powered application for automated generation of hospital discharge summaries.
- Streamlined healthcare workflow reducing manual documentation time by significant margin.

•Movies Recommendation System

Python, ML, Scikit-learn

Content-based recommendation engine using machine learning algorithms.

- Designed and implemented content-based filtering using TF-IDF vectorization and Cosine Similarity.
- Achieved high accuracy in recommendation relevance through feature engineering and algorithm optimization.

Technical Skills and Interests

Programming Languages: Python, Java, C

Frameworks & Libraries: TensorFlow, Flask, React

Databases: MySQL, SQL

Tools & Platforms: Git, GitHub, VS Code, PyCharm, Google Colab, Jupyter Notebook

Data Science & Visualization: Pandas, NumPy, Matplotlib

Concepts: Object-Oriented Programming (OOP), REST APIs, Data Structures & Algorithms

Areas of Interest: AI & Machine Learning, Web Development, Data Science

Soft Skills: Problem Solving, Self-learning, Team Collaboration, Adaptability, Communication

Certifications

–Python | Coursera

–Python Data Structures | Coursera

–Introduction to Generative AI | IBM & Google

–Oracle APEX | LinkedIn Learning

–Git for Beginners | Udemy

Achievements

–Winner | Ikarus 2023

–Finalist | AI Days 2025

–Participant | AI Hack Day 2025

–Participant | Hackstorm 2025
