EDUCATION

KG Reddy College of Engineering and Technology

November 2022 – June 2026

Bachelor of Technology in Computer Science and Engineering – AI & ML (CGPA 8.93/10)

Hyderabad, India

INTERNSHIPS

Machine Learning Intern, Bharat Intern

Mar 2024 – Apr 2024

- Built and trained ML models using Scikit-learn and Pandas, including data preprocessing and feature engineering.
- Evaluated model performance using standard metrics and iterated on feature sets to improve accuracy.

Web Development Intern, I & T Labs

Dec 2023 – Jan 2024

- Developed full-stack web applications using HTML, CSS, and JavaScript with Git/GitHub version control.
- Collaborated with the team on debugging and refining UI components to improve usability.

PROJECTS

MailMate – AI Email Reply Assistant | Python, Streamlit, LLM APIs, Prompt Engineering

🐙 github.com/shivakumarsouta/MailMate-2.0

- Built an AI-powered assistant that drafts context-aware email replies with customizable tone selection, streamlining response time for everyday correspondence.
- Designed an in-app draft editing workflow within a Streamlit interface, allowing users to review and refine AI-generated replies before sending.
- Deployed the application for live use, enabling end-to-end email drafting from prompt to polished reply.

MediBot – RAG-Based Medical Chatbot | Python, LangChain, FAISS, Groq API, Sentence-Transformers, Streamlit

🐙 github.com/shivakumarsouta/MedicChat-Streamlit

- Developed a Retrieval-Augmented Generation chatbot that answers medical queries using a custom knowledge base built from curated medical PDFs.
- Implemented semantic search with FAISS vector indexing and sentence-transformer embeddings to retrieve contextually relevant passages before generation.
- Integrated the Groq API for low-latency LLM inference, delivering fast, grounded responses through a Streamlit interface.

CineHeist – Movie Recommendation System | Python, Scikit-learn, TF-IDF, Cosine Similarity, Streamlit

🐙 github.com/shivakumarsouta/cineheist

- Built a content-based recommendation engine that suggests similar movies using TF-IDF vectorization over a large movie metadata dataset.
- Applied cosine similarity to rank and retrieve the closest matches, enabling accurate, explainable recommendations without relying on user rating history.
- Deployed an interactive Streamlit app allowing users to search a title and instantly view recommended movies.

TECHNICAL SKILLS

Languages: Python, SQL, Core Java, JDBC

Web Development: Streamlit, REST APIs, HTML, CSS

Machine Learning & AI: Scikit-learn, Pandas, NumPy, Prompt Engineering, LLM APIs (Groq)

LLM, RAG & Data Engineering: Retrieval-Augmented Generation (RAG), LangChain, FAISS, Vector Databases, Embeddings, Semantic Search

Developer Tools & Platforms: Git, GitHub, VS Code, Streamlit Cloud, Jupyter Notebook

CERTIFICATIONS

- Introduction to Generative AI – IBM & Google
- Python Programming – Coursera
- Git for Beginners – Udemy
- MySQL – Udemy

ACHIEVEMENTS

- Winner, Ikarus 2023 (inter-college technical event)
- Finalist, AI Days 2025 (state-level hackathon)
- Participant, AI Hack Day 2025 and Hackstorm 2025 (college-level hackathons)
